Profile

Full stack developer with a drive to design and deliver professional products. I take pride in maintainable and solid code that fixes real world problems. Not afraid to explore a new technology or dive deeper into a specific part of software development.

Key technical skills

Python
Django
Unittesting

PostgreSQL
REDIS

React
React (native)
Typescript

Docker
Gitlab CI/CD

HTML5
CSS

Experience

Autralis/Full Stack developer
NOVEMBER 2019 - Present, Merelbeke
- Lead developer
- Setting up and maintaining services in a (micro)service architecture
- Maintaining, extending and starting several React & React-native applications.
- Dockerized a bunch of existing products
- Introduced CI/CD to the company and set them up with linting, security testing, unit testing, lighthouse testing and automatic builds/releases
- Developed a machine-learning product to predict the correct asking price of second-hand cars as the sole developer.

Yapla/Full Stack developer

SEPTEMBER 2019 - NOVEMBER 2019, Ghent

Worked on 3 projects for the city of Antwerp as a front-end developer.

Optimile/Full stack developer + UX responsible + SCRUM master

JANUARY 2018 - SEPTEMBER 2019, Ghent

Part of the development team as a full stack developer developing and maintaining a React Native app, AngularJS webapp and Django platform. Also responsible for UX and scrum master.

Ontoforce/Data Scientist

JULY 2015 - JANUARY 2018, Ghent

Semantically integrating over 50 sources from both public and client databases. Also maintaining the quality of the data in our public database.

Education

Ghent university/Master of science: Biochemistry & Biotechnology

2013 - 2015, GHENT

Major Bioinformatics and systems biology - minor microbial biotechnology. My thesis analyzed interaction networks of molecular reactions to antibiotics in E.coli both numerically as graphically.

Ghent university/Bachelor of Science: biochemistry and biotechnology

2010- 2013, GHENT

Other info
